

Acknowledgements

During the development of this book, Dr. Sven Erik Jørgensen passed away on 5 March 2016. Beyond being an award winning scientist, he was a champion for ecology and environmental management, and overall a remarkable man. He will truly be missed.

After his passing, a number of friends and colleagues stepped up to help us in completing this book. We extend a special thank you to Dr. Dubravko Justic and to

Dr. Soeren Nors Nielsen. Without their help, this book would not have been completed.
