

**Aula P11 – dias 17 e 22 maio: coração I**  
**(histologia cardíaca e cardiomiócitos induzidos)**

# Regeneração do coração

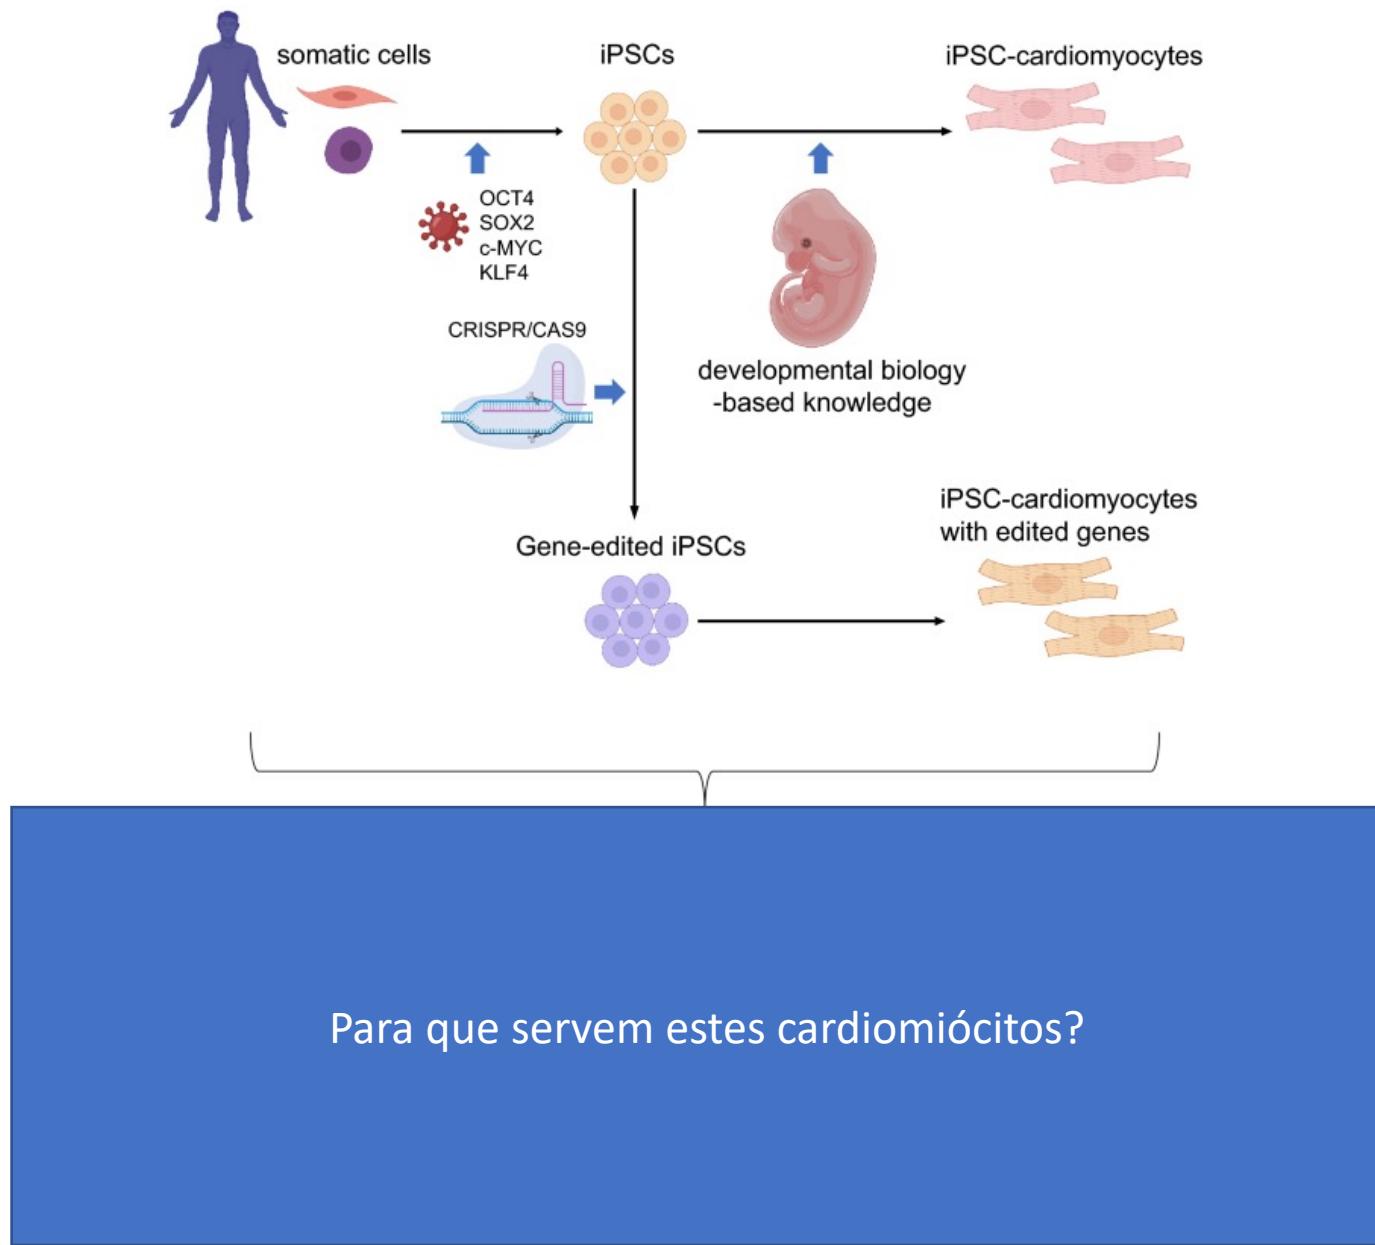

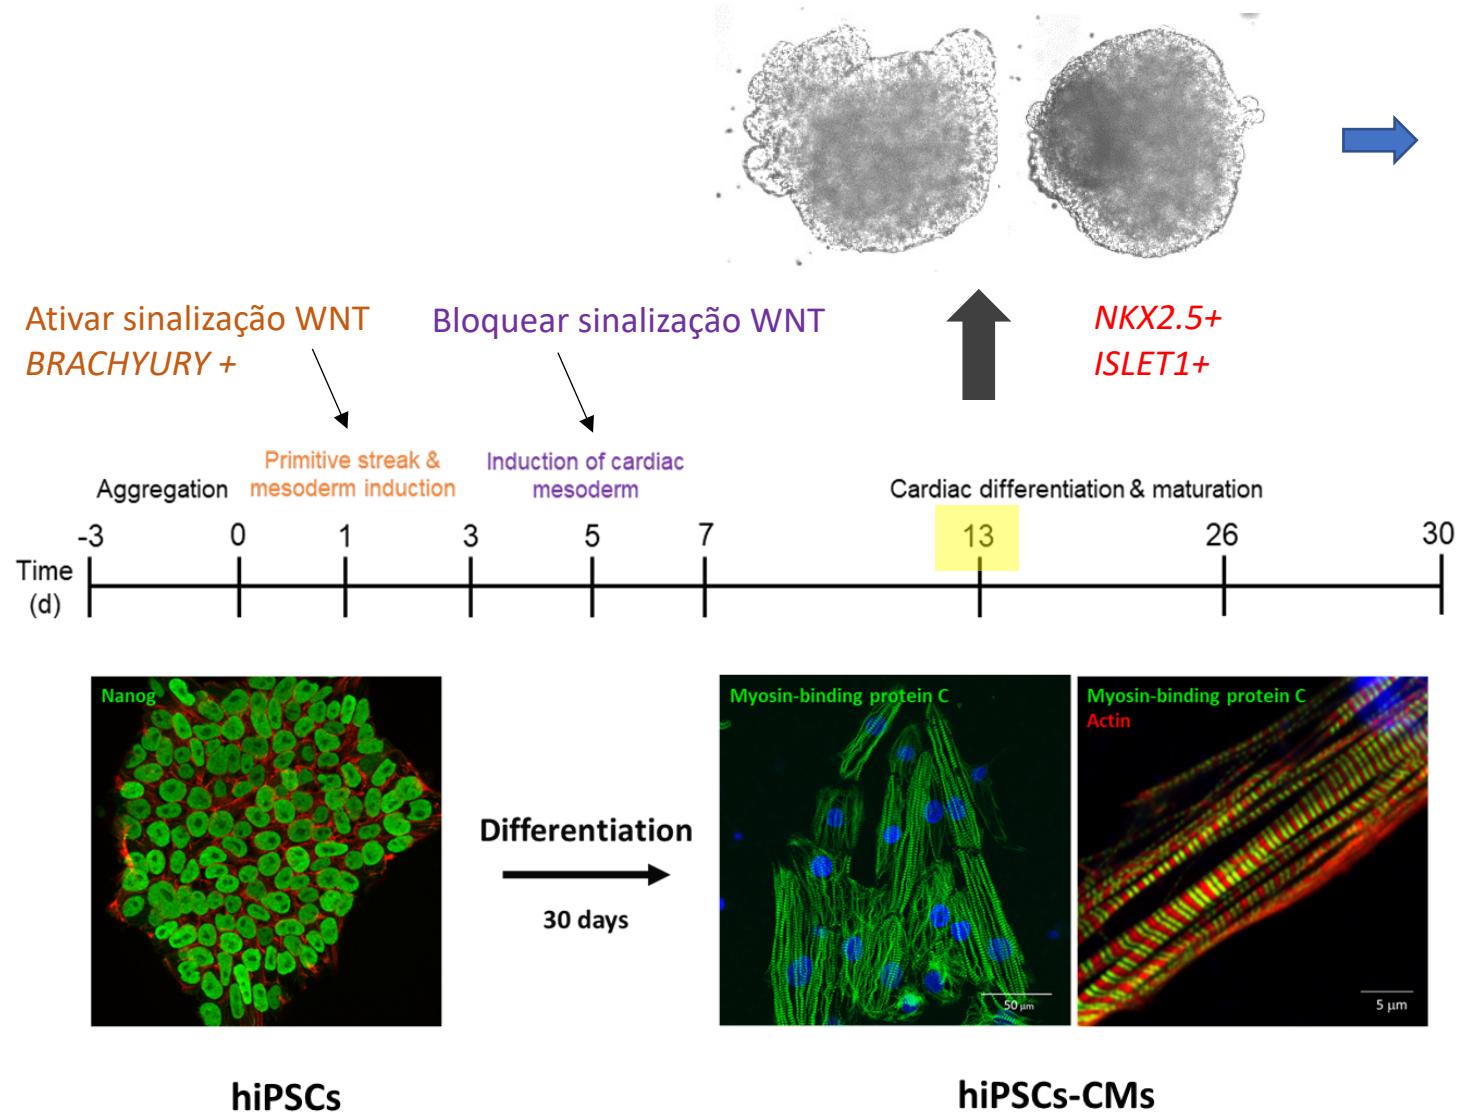

# Células estaminais induzidas para cardiomiócitos

Shinya Yamanaka was awarded the 2012 Nobel Prize along with Sir [John Gurdon](#) "for the discovery that mature cells can be reprogrammed to become pluripotent.

In his Nobel seminar, Yamanaka cited the earlier seminal work of [Harold Weintraub](#) on the role of [myoblast determination protein 1](#) (MyoD) in reprogramming cell fate to a muscle lineage as an important precursor to the discovery of iPSCs

Disease modelling in cardiomyopathies:

- Transcriptomics
- Morphology
- Calcium transients
- Metabolism
- Drug discovery

# Heart Layers

# Histología de músculo cardíaco
